## Delirium in the Elderly ©

The purpose of this DVD is to alert people to the need to consider delirium as a possible cause of any acute changes in a client's/resident's mental status or behaviour. The DVD presents interviews and scenarios to detail the signs of delirium. The Confusion Assessment Method is highlighted as one assessment tool to use. The DVD ends with vignettes designed to test the viewer's recognition of the hallmarks of delirium.

You will receive one VHS cassette accompanied by two handouts - Delirium in the Elderly and the Confusion Assessment Method (CAM). The DVD is 30 minutes in length – 24 minutes of content and six minutes of vignettes.

## Psychosis in the Elderly ©

Psychosis in the Elderly© is a two-part DVD series – the duration of each part is 30 minutes. Part One is an introduction to psychosis and its appearance in the geriatric population, describing symptoms and behaviours, challenges to caregivers, and care strategies. Part Two is a simulated psychiatric interview highlighting the diagnostic features of this disorder.
